

CR570 20 oz Cartridge Retainer

The CR570 Cartridge Retainer has been designed for use with Techcon, Semco, and Nordson EFD 20 oz plastic cartridges. The new seal design delivers greater performance and durability by sealing directly onto the inside of the “inserted” cartridge.

The high grade anodized aluminum retainer and cap provide a safe dispensing pressure of up to 100 psi (6.9 bar). The high performance, heavy-duty design also makes this system ideal for use in industrial environments and ensure long lasting use.

Spare Parts & Accessories (Sold Separately)

Item Number	Description
CR570-SEAL	Retainer Cap Sealing Ring
562146	Quick Connect Hose (6 ft)
560534U	20 oz Cartridge Retainer Stand

*560534U stand sold separately

Item Number	Description
CR570	20 oz Cartridge Retainer Assembly (Retainer, Cap, Seal, and Hose)

Features & Benefits

- Compatible for use with Techcon, Semco, and EFD 20 oz cartridges
- Machined slots in retainer body allow for the fluid level inside the “inserted” cartridge to be easily monitored
- Optimized tube design reduces the cartridge expansion while decreasing the risk of air ingress into the fluid
- Quick connect air-inlet connector allows for the safe removal of compressed air from the retainer when replacing the cartridge
- Can be attached directly to a Fisnar dispense controller or used as a valve fluid feed system/reservoir
